

## COMPENG 2SH4 Project – Statement of Contribution

Your Group Name Sirisha and Mehar

Your Name Mehar Sidhu

Your Team Member's Name Sirisha Neelamaygum

**You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:**

1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.

I worked on iteration 0 (fully), iteration 1B (fully), iteration 2A (fully), iteration 2B (split with partner) and iteration 3 (feature 1- split with partner), iteration 3 (feature 2) and iteration 3 (feature 3 - split with partner).

2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.

Partner worked on iteration 1A (fully), iteration 2B (split with me) and iteration 3 (feature 1- split with me) and iteration 3 (feature 3 - split with me).

3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.

From this experience, I learned that for programming with a partner there has to be constant communication and clear distinctions between what each person is going to do. With me and my partner we did a very good job distinguishing tasks but also helping each other when we were stuck on a certain task. I learned that it wasn't working when we were both on very different parts of the code, we decided to restructure our workflow so that it would overlap and we were able to communicate better about what we were working on.
